

GCP-20B Rotary Cup Measure Liquid Filling Machine

This machine is atmospheric pressure filling machine, rotary continuous filler, cup-type measurement (adjustable), through a specially designed cutting and filling valve drip with micro-vacuum device (patented technology), Work, no leakage, only Need to replace some of the other accessories, you can meet all kinds of 50-1000ml glass bottles, PET bottles in the automatic filling.

Technical parameters:

- ◆ Motor power: 1.5 Kw
- ◆ Number of filling heads: 10,16,20,30 filling heads optional
- ◆ Filling capacity: 50~1000ml
- ◆ Production speed: 2400~7200 bottles/hour (500ml water for example)
- ◆ filling accuracy: $\pm 0.5\%$ (250ml or more for example)
- ◆ Dimension: 2000×1300×2100 mm
