

Cuff Type Semi Automatic Shrink Wrapping Machine for Food CK-FX5038 + CKBS-6040

The cuff type semi automatic shrink wrapping machine can aggregate individual or multiple items. And according to the number of packaging, size, the machine to adjust parameters, so as to adapt to different packaging specifications.

Semi Automatic Shrink Wrap Machine Composition:

- © Shrink film frame drum thickening, bearing capacity, easy to change the film, after adjusting the position of the film with both sides of the baffle ring fixed.
- © The sealing and cutting parts are coated with teflon, resistant to high temperature, no cracking, no smoke, zero pollution, the sealing frame is made of high quality alloy, and the frame is not easy to deform.
- © Pressure board, fixed packaging objects, strong stability, packaging effect more neat.
- © Leakage protection device, multiple protection, safer use.

Semi Automatic Shrink Wrapping Machine Characteristics:

- © The upper and lower power supply is controlled by inductive switch, which can effectively prevent miscutting the package and ensure the safety of the operator.
- © High performance omron PLC, so that the shrink wrap machine for food stable and reliable operation.
- © Omron ac contactor and high-power solid state adjustment perfect combination, equipped with intelligent instruments, so that the system temperature more accurate, longer service life.
- © High power stepless transmission system ensures transmission quality.
- © Up and down hot air circulation system, to ensure a perfect packaging effect.
- © PID temperature controller is set to ensure accurate temperature control and energy saving.
- © Automatic control system, stable and reliable production process, can adapt to long working hours.

© Touch screen control, so that the semi automatic shrink wrapping machine movement control into a high precision intelligent state. All actions are monitored and the status is displayed on the touch screen, making the machine run more safely and reliably. The machine is equipped with automatic alarm device to further improve the safety and reliability of the machine.

© In order to make the operator and the shrink wrap machine for food itself play a more safe and effective role, the machine uses advanced technology, set up a number of automatic protection measures to ensure the safety of the machine and the operator.

Sealing and Cutting Machine			
Model	CK-FX5038	Power	1.6kw,220V/50HZ,
Max Packing Size	450*270*330mm		
Packing speed	0---8 pcs/min	Pressure	5kg/square
Dimension	1020*830*1500mm	Weight	170KG
Heat shrinking Machine			
Model	CKBS-6040	Heating power	22KW
Max Size of Packing chamber	600*400*1500mm		
Dimension	2500*850*1400mm	Weight	200kg
