

L Type Shrink Packing Machine ZW-450S

Pharmaceutical, food, stationery, cosmetics, electronic products, toys, etc.

Performance characteristics:

- Fully enclosed packaging.
- Automatic film feeding, bag making, sealing and cutting, waste collection, leveling, shrinking, and packaging finished products are completed in one time.
- Constant temperature special grade aluminum alloy sealing cutter, anti-adhesive, fine sealing line, no coking, no smoke, zero pollution.
- The knife will automatically bounce after cutting into the package.
- The size of the package can be adjusted freely without changing the mold.
- All the conveyor belts are covered with PTFE insulated tubes, which are not hot and do not damage the membrane.
- The shrink chamber is a double-cycle hot air system, and the temperature can be adjusted freely.
- The conveying motor adopts the infinitely variable speed motor, which has long service life and low noise.

Technical Parameter:

Sealing type	L-type fully enclosed
Power supply	200V/50-60Hz
Maximum speed	15--25 packs / minute
Packing height	≤150mm
Sealing line size	450x550mm
Use film	POF to fold the film
Maximum film	530mm (width) * 280mm (outer diameter)
Total power	1.3kw
Air pressure	4-5kg/cm ²
Dimensions	1750*900*1450mm
Machine weight	300kg
