

Drip Coffee Bag Packing Machine PL-188

Application: Coffee powder, small granular material.

Features:

- Adopting a special hanging ear filter, three-side sealing, hanging directly on the edge of the cup, the coffee brewing effect is better, and the bag shape is beautiful, which is very popular in foreign markets.
- This machine has the functions of automatic bag making, metering, filling, sealing, slitting, counting and printing batch number.
- The precise control system is used to adjust the movement of the whole machine. The structure is compact, the man-machine interface is designed, the operation is convenient, the adjustment is easy, and the maintenance is easy.
- The inner bag length is driven by servo motor, which is accurate in positioning and stable in bag length. The outer bag is positioned by photoelectric switch, and the film is stepped to make the bag length accurate and beautiful.
- The inner bag is a non-woven ear bag, which is convenient and hygienic. The sealing adopts advanced ultrasonic sealing, which has good sealing effect and beautiful bag shape.

Specification:

Model	PL-188
Bag size	Inner bag : W : 90 (mm) L : 70(mm) Out bag : W : 100 (mm) L : 120(mm)
Speed	25-40bags/min
Volume Range	3-10g(can customized by special demands)
Power	220V/50Hz/3.5KW
Weight	660KG
Dimension	1350*850*2200mm
