

## *Horizontal Cookie Flow Wrap Packaging Machine LG-400*

Horizontal flow wrap machine not only uses the chain and chain wheel set, it can meet the special requirements of customers, the machine configuration is different also, servo motor and timing belt can maximum meet the personalized requirements of customers. Moreover, the machine simplifies the drive system, improves the packaging speed and stability of the machine, improves the control accuracy and reduces the noise. Its unique design makes it easier to maintain and operate. In the present market, machines are selling well both at home and abroad.

### **Characteristics**

1. Horizontal flow wrap packing machine adopts photocell detection color tag and double track system, this system can effectively eliminate the packing error, avoid waste packing material, saving customers the cost of production, increase customer's profit.
2. In the process of operation, the electromechanical control system is adopted simultaneously. This system has high control precision and can maximize the machine's stepless control and automatic dynamic adjustment.
3. Horizontal flow wrap packing machine is equipped with large color touch screen, it can automatically adjust, tracking goods, makes it easier to find the most suitable cutting points,
4. Cookie packaging machine has automatic alarm, the screen instructions obstacles, automatic counting, automatic display bag length and speed, can realize precise cutting and sealing.
5. Horizontal flow wrap packing machine exclusively adopts timing belt drive in material transportation, featuring low vibration, low noise and novel appearance.
6. The adjustable packaging provided by the machine can make the replacement of products more convenient and fast.
7. Automatic display of bag length and speed enables accurate cutting and sealing.

## Technical Data

<b>Model</b>	<b>LG-400</b>
Film Width	Max. 400mm
Bag length	180-440mm
Bag width	50-190mm
Bag height	Max.60mm
Film Diameter	Max. 320mm
Packing speed	40~230 bags/min
Power supply	110V/60 H Z,2.4 KW
Machine size	(L)4020X(W)770X(H)1450mm
Machine weight	900Kg
