

Broth Automatic Packing Machine BR-2R

Feature

- The roller has been processed with special automatic fixture.
- The frame has been processed with laser cutter to make the connection state of each unit accurate.
- The weighting can be controlled on operation.
- Phenol has been used in the supply line so that a simple attachment/detachment make it easy to wash the area from a hopper to a nozzle with water.
- Safety cover and alarm device have been attached for safe management.
- Each part has been standardized and simplified to reduce time taken for replacements. Better yet, the machine rarely generates replacement parts.

Contents

Gravy for cold noodles, structure water, soy soup, udong soup and other relevant products

Packing material

AL+PE, OPP+PE, NY+PE, Other relevant packing papers with 3 sides sealed available for thermal sealing

Specification
