

4 Head High-Precision Vibration Linear Scale

The 4 head high-precision linear combination weigher adopts an all-stainless steel sealed body, which is anti-corrosion and dustproof; the parts in contact with the material (storage bucket, lower hopper, vibrating plate, weighing hopper, etc.) can be quickly disassembled, which is particularly convenient for cleaning. And the food automatic linear scale can be used with various packaging machines and filling machines, and can also be used for semi-automatic packaging.

Main Advantages

1. IP65 waterproof and dustproof design
2. The amplitude can be adjusted individually, making the operation more convenient
3. The customized sensor has super shock resistance and is durable;
4. It can be used in conjunction with other packaging equipment with strong compatibility;
5. Uniform design standards and mold making technology are used to make the interchangeability of various parts stronger.
6. Automated design and specialized production. Product guarantee and good quality. Factory direct sales, affordable

Specification Parameter

- Weighing range: 50-2000g
- Weighing speed: 55Wpm
- Hopper capacity: 3L
- Parameter preset: 20
- Power requirements: 220V, 50/60Hz, 6A
- Packing size: L1080 W1030 H820
- Weighable materials: non-viscous materials such as powders and granules
- The size is for reference only and can be customized
