

HP Series Integrated Weighing and Packing Machine

- Integrated weighing and packing design: microcomputer scales and packing machine unified operation, improve the weighing and packing speed.
- High precision, small target weighing, choose the best combination, high accuracy and speed combination.
- Simple high-speed operation: microcomputer control, touch screen display, convenient operation and maintenance.
- Contracted space: unique weighing packing design, vastly reduce the height and save space.
- Precise positioning: servo control tension membrane, tension membrane accurate positioning, electric automatic tracking and trademark accurate location.
- Quick return on investment: largely save raw material and labor cost.
