

LY-ZQ-18 Wrap Around Shrink Label Sleeve Labeling Machine

Our range enables you to efficiently and cost-effectively pack and promote your products. Whether it is PET, HDPE, glass bottles, cans or jars, we have traditional and robotic technologies capable of working at multiple production speed levels

Sleeve applicator systems

Shrink Sleeve Label and Tamper Evident Band applicator

Linear Machines with one or two spiral screws for the product spacing before the sleeve application process.

They are equipped also with a single or double sleeve reel storage.

Possibility to improve the sleeve system with the additional accessories.

Our shrink sleeve machines are suitable for collar and full body sleeve as well as tamper evident cap sleeves. They can be used for containers with different shapes and diameters ranging from metal cans to plastic bottles.

Technical Parameters

Model	LY-ZQ-18
