

Multi-function Vertical Weighing and Packaging Machine

The automatic packaging machinery to complete the bag, measuring, filling, nitrogen, play yards, cut bags and so on.

Vertical Automatic Packaging Machine with different feeder can package different products.

- Solid: candy, peanut, green bean, pistachio, brown sugar, cake, daily commodities, cooked food, pickles, puffed food etc.
- Granule: grain, granular drug, capsule, seed, condiments, granulated sugar, chicken essence, melon seeds, nuts etc.
- Powder: milk powder, coffee powder, food additives, condiments, tapioca powder, coconut powder, pesticide powder, fertilizer granules etc.
- Various bag types: all type of side seal bags, e.g. pouch, back-sealing bag, linking bags, etc.

Features

1. New design, beautiful appearance, more reasonable structure, more advanced technology.
2. The production line supporting machinery in addition to marked materials are stainless steel, all machine structures are in accordance with food hygiene standards selected design.
3. Often dismantling the structure are easy to dismantle the connection, to ensure that the shift or change the product when dealing with health convenience.
4. Multiple automatic alarm protection functions to minimize damage.
5. Touch screen and stable and reliable PLC control, bag-making, metering, filling, sealing, coding, bag-cutting one-time completion.
6. External film release mechanism is adopted to facilitate the installation of packaging film.

Technical Parameter

Function	Filling, Sealing, Forming
Packing weight	100~1000g
Packing bag type	pillow back sealing bags with gusset
Making bag size	(L)80-350mm, (W)80-250mm
Production capacity	25-70 bags / min
Compressed air consumption	0.5 cubic / minute 0.6-0.7Mpa
Power Supply	220V, 50-60Hz, 3.0 Kw
Dimension	1550*1200*1550mm
Weight	500kg
