

## ***DXDK 80C Automatic Granule Packing Machine for Sugar, Tea, Salt***

DXDK 80C automatic sachet packaging machine can do granule material packing in the small sachet.

The process of measuring, bag-making, filling, sealing, printing and cutting can be done automatically.

### **Packaging Material:**

Various Laminate Film, for example: Polypropylene / Polythene, Polyester/Aluminum foil/Polythene, Polyester/Aluminum-plating/Polythene, Nylon/ Polythene, Polyester/Polythene, etc.

### **Main Features**

1. Adopts CPU to control each function states, and setup the man-machine conversation interface.
2. The Double channel temperature of the horizontal and vertical is controlled by intelligent temperature controlling device.
3. Intelligent photo cell orientation, transform discretionarily between the light/shade. Strongly anti-jamming, when two bags can't catch up with the upper mark the machine will stop and give an alarm.
4. The packaging speed can be adjusted continuously within specified range. Orientation open mouth and stop.
5. The bag-making has high precision. Easily Operation and maintain.
6. Measurement adopts adjustable cup method, which is accorded with the national measurement standard.

**Technical parameters:**

Dosing system	filling capacity	ml	1-50
	filling accuracy	±%	3
	cups numbers	pair	6
Forming sealing and cutting	bag size (length*width)	mm	(50-120)*(40-85)
	speed	bag/pieces	50-80
	seam type	design	grid or beeline
Option	machine body	material	painting or stainless
	date coding	type	ribbon or embassying
	sealing size	design	3 or 4
