YX-PSF06 *Automatic Pre-Sterilized Syringe Filling Sealing Machine*

YX-PSF06 Automatic Pre-Sterilized Syringe Filling Sealing Machine characteristics:

- The machine is suitable for liquid & rubber plugging on glass or plastic syringes. Other types of syringe are also up to custom made.
- 6 nozzles are for filling simultaneously.
- Plugging can be either by pressing down or screwing ways.
- Plugging is done parallelly with filling, multi point's inspection with optical fiber sensors, neither filling nor plugging when syringe is missed.
- All product contact parts are of AISI316L and medical silicon.
- Actual working status can be displayed on touch screen with multi languages.
- Rotating plunger pumps are driven with servo motor. Precision adjustment can be made on touch screen without any tools. Each plunger pump can be adjustable slightly.

Model	YX-PSF06
Filling volume	0.5ml-100ml
Number of filling head	6sets
Capacity	1800-3600 syringes/hour
Sealing method	Pressure or screw
Compressed air	6kg/cm ² ,0.15m ³ /min
Supply	3P 380V/220V 50-60Hz 2.0Kw
Dimension	1800*800*1700mm (L*W*H)
Net weight	750Kg
