

Double filling machine HHG-S16

Filling is mainly used in pharmaceutical, food and chemical industries such as glass bottles, plastic bottles, metal bottles of different bottle shape; especially suitable for pharmaceutical infusion products filling, optional nitrogen charging device, and after production equipment can be composed of production line. This machine adopts double bottle, 16 pump filling, double plugging, while improving the relative yield. It can be checked as a dustproof cover or RABS.

Features:

- Using the siphon needle, non - dip, no drops.
- Pneumatic plug, plug the high rate of the upper.
- Low consumption, no pollution, no noise.

Technical Parameters:

Bottles applicability	20-500ml
Outout	120 bottles/min
Stoppering qualification	>99.8%
Power source	220V 50Hz
Power	1.5kw
Weight	800kg
Overall size	3000 x 1500 x 1700mm
