

HS-QZD500 / HS-QZD1000 Automatic Bag Packing Machine For Powder and Granule Filling

This packaging machine is developed for granule/powder materials packing aimed at charcoal powder, chemical powder, detergent powder, animal feed, seed, etc. The machine is of the function of automatic bag fetching, automatic filling, automatic packing and automatic sealing. It is also able to be linked to various production equipment before or after the packing machine to work together to achieve unattended production.

Features:

- A. LCD touch screen to easily control every procedure of packing.
- B. HMI system more favorable for operation.
- C. Automatic fault display and diagnosis makes it simple and quick for maintenance.
- D. Safety shutdown protection mechanism to ensure human and machine safety
- E. Quick adjustment and easy maintenance enables high working efficiency.

Application:

It is suitable for widely suitable for food, medicine, chemical industry, such as food additive, milk powder, bean powder, coffee powder, tea powder, instant powder, flour powder, starch, medical powder, and cosmetic powder etc.

Parameters:

Material of preformed bag	Compound plastic woven bag
Packaging specification	10kg-50kg
Speed	300-1200 bags/h (regarding to different size & material)
Weighing accuracy	± 0.2%
Power supply	380V 50Hz 6KW
Working Temperature	-15℃~45℃
Machine size	6000*2000*4900mm
Air supply source	0.6M~0.8Pa
