

Chocolate Coin Wrapping Machine SC-200B

The chocolate paste will be deposited on the plastic mold for chocolate coin making, then transferred to the cooling tunnel for complete cooling and formed purpose. The chocolate weight will be controlled by the depositor controller in chocolate coin production line.

Technical Parameters:

Model	SC-200B
Packing material	±0.05mm aluminum foil
Packing size	coin shape 22—39mm(double)
Production capacity	±110 pieces/min
Packing size	coin shape 40—80mm(odd)
Production capacity	±60 pieces/min
Overall dimension	1650X1450X2000mm (LXWXH)
Weight	1600kg
