

## MD-200K Premade Bag Granule Packaging Machine

The packaging system consists of a bag packaging machine, a working platform, an electronic scale, and a Z-shaped elevator. The premade pouch packing machine also features a design with a large opening, secure clamping, and neat, aesthetically pleasing sealing. Scope of application:

Block materials: dried tofu, fish larvae, eggs, candies, red dates, wheat, chocolate, biscuits, peanuts, greens, pistachios, rock sugar, daily necessities, puffed foods, etc.

Granules: crystalline monosodium glutamate, granular medicines, capsules, seeds, chemical raw materials, sugar, chicken essence, nuts, nuts, pesticides, fertilizers, and feed.

Small packages: packaged small packages of various materials.

### Features

1. Fast packaging speed and stable performance.
2. Innovative device, large opening, firm clamping, neat and beautiful sealing.
3. Low cost, innovative solution to various packaging problems.
4. Use pre-made bags, perfect pattern, good seal quality, high product grade.
5. Screw adjustment, easy to operate.
6. Customizable language operating system.

### Parameters

Model	MD-200K		
Working Position	8		
Production Efficiency	35-60 bags/min		
Bag Size	L: 100mm-400mm W: 55mm-200mm (customizable)		
Packing Range	10-2500g		
Power Supply	9.8kW/380V	Air Consumption/Pressure	6-8bar/0.6m <sup>3</sup> /min
Machine Dimensions (L.W.H)		Machine Weight	1400kg
