

SF-CM100 Automatic Vacuum Jam Sauce Glass Jar Bottle Capping Machine

The automatic vacuum capping machine is suitable for all kinds of food production industries, such as pickled vegetables, pickled fruits, olives, beans, onions, bean sprouts, cucumbers, eggs, peeled garlic, sardines, meat and other products. The machine has the function of vacuuming and then capping, which can effectively extend the shelf life of food.

Features

1. The machine can automatically complete the processes of bottle conveying, cap placement, vacuuming, capping, and bottle output.
2. It has multiple sets of detection electric eyes to realize functions such as no bottle entry without cap, no capping without cap, and automatic alarm for lack of cap.
3. It has a built-in high-power vacuum pump with good vacuuming effect, which can extend the shelf life by more than double the original basis.
4. The whole machine is made of SUS304 stainless steel, which is corrosion-resistant, has a long service life, and meets GMP standards.
5. It adopts intelligent PLC control with a high degree of automation.

Specification

Cap diameter	φ40-160mm(can be customized)
Bottle diameter	φ30-150mm(can be customized)
Bottle height	40-250mm(can be customized)
Capacity	30-40bottles/min
Vacuum degree in bottle	>0.06Mpa
Dimension	3800(L)*1550(W)*2200(H)mm
Power	220V, 50/60Hz, 4kw
Machine weight	700kg
