since 1991

WVVB Series Chamber type Vacuum Sealer

WU-HSING's WVVB Chamber type Vacuum Sealer. Made by stainless steel (SUS#304) housing, hygiene and safety. It maintains a high vacuum level and preserves liquids and powders within the bag. Package size is limited by the size of the vacuum chamber. Impulse sealing model requires no preheating, but requires a Congealing time. The acrylic cover allows for viewing of the vacuum packaging process.

The vacuum seal protects the product, extends its shelf life, and reduces its size for easy storage and transport. Available in tabletop and floor-standing models for various package sizes, the deep trough model is suitable for vacuum packaging of liquids and powders (contents cannot exceed 50% of bags)

Sealing width: 5mm. (twin sides sealing lines can be created, doubling the packaging capacity.)

Equipped with a vacuum pump, the dry type is suitable for dry solids, while the oil filling type offers a high vacuum level and is suitable for liquids, powders, and products requiring a high vacuum level. (The oil pump requires oil replacement.)

Compatible with all types of vacuum bags and aluminum foil bags.

Functions: Food: Extends shelf life, prevents oxidation, mold, moisture, preserves freshness, and prevents odor loss...Electronics and hardware: Moisture-proof, rust-proof, and prevents movement during transportation...

Options: twin sides sealing, German pump, 10mm

Applications: Food, aquaculture, chemical, and electronics industries.

Specification

Specification	WVVB-255A	WVVB-255C	WVVB-255DB
Voltage	110/220/240V 1Phase	110/220/240V	110/220/240V
Ideal	Dry and solid products	Less sauce, powder, liquids	50% Liquid Powder Inside Bag
Vacuum Chamber Dimensions	250*330*80mm	250*330*80mm	250*318*150mm
Max, Sealing (L*W)	250*5.0mm	250*5.0mm	250*5.0mm
Pump Type	Oil-less Pump	Oil-less Pump	Oil Filling Pump
Vacuum Time	01-99 sec		
Sealing Time	0-6 sec.	0-6 sec.	0-6 sec.
Cooling Time	10 sec.		
Dimensions	365*420*360mm	365*420*360mm	365*420*360mm
Machine Weight	27KGS	29.5KGS	40.5KG
Materials Used	Any Vacuumable Bags		

Specification	WVVB-355A	WVVB-355B
Voltage	110/220/240V	110/220/240V
Ideal	Dry Solid Products	Less sauce, powder, liquids
Vacuum Chamber Dimensions	370*500*120mm	370*500*120mm
Max, Sealing (L*W)	350*5.0mm	350*5.0mm
Pump Type	Oil Filling Pump	Oil Filling Pump
Vacuum Time	01-99 sec	
Sealing Time	0-6 sec.	0-6 sec.
Cooling Time	10 sec.	
Dimensions	480*570*570mm	365*420*360mm
Machine Weight	59 KG	60KG
Materials Used	Any Vacuumable Bags
