

**TABLET & CAPSULE SERIES**

# TCM-17 TABLET COMPRESSION MACHINE

## Applications:

This machine is suitable for press the grain material or powders to be round or irregular shape tablets, which widely suitable for the industries of Pharmaceutical, Chemical, Foodstuff, Powder etc.

## Special Features

Helps in reducing waste of the powder formulation. The machine gives you control over the manufacturing process and the set up is much more efficient than a single press machine. Rotary tablet press machines are usually automatic and can produce tablets as fast as 150 tablets per minute.

## Main Data

- Speed  
-20,000-40,000 pec/hour

---

- Feeding System  
-Hopper

---

- Power Supply  
-Single/Three Phase

---

- Tablet Size  
-As per URS

---

- Weight  
-Approx 1000kg
