

JG-6H Fully Automatic Piston Filling Machine

Machine features:

A. The machine is made of high-quality domestic stainless steel

B. Imported accessories for the overall pneumatic components of the machine, PLC control using Mitsubishi from Japan, touch screen operation settings

C. The sealing components are made of domestically renowned silicone rubber (wear-resistant, high temperature resistant, acid alkali resistant, corrosion-resistant) and flour rubber (wear-resistant, strong acid alkali resistant, strong corrosive)

E. This machine is suitable for filling all kinds of liquid washing liquid, such as nursing liquid, oral liquid, hair care liquid, hand washing liquid, skin care liquid, disinfectant, liquid foundation, antifreeze, shampoo, eye wash liquid, nutrient liquid, injection, pesticide, medicine, cleaning, shower gel, perfume, edible oil, lubricating oil and liquid filling for special industries

F. The linear filling machine is designed with reference to similar advanced foreign brand machines and enhances some additional functions. Make the product simpler and more convenient in terms of operation, precision error, installation adjustment, equipment cleaning, maintenance, and other aspects.

Technical parameters:

1. Filling range: 100-5000ml
2. Number of filling heads: four heads, six heads, eight heads, ten heads
3. Filling accuracy: $\leq \pm 2\%$ standard filling volume
4. Compressed air pressure: $\leq 0.6-0.7\text{Mpa}$
5. Gas consumption: 15m³/h
6. Power supply: 220/380V 50Hz
7. Electric power consumption: $\leq 2\text{KW}$
8. Net weight: $\leq 800\text{kg}$
