

G1LGD100-5000 Vertical Single Head Paste Filling Machine

This series of filling machine is the company with reference to foreign advanced filling machine technology to transform and innovate the product, its structure is more simple and reasonable, high precision, the operation is more simple. Applicable to medicine, cosmetic, food, pesticide and special industries, is the high viscosity fluid, paste the ideal equipment for filling. Reasonable design, small size, easy operation, more filling volume adjustment handle, filling speed can be adjusted, filling high precision. Filling the valve head with anti-drip, anti-drawing and lifting filling device. This series of filling machine is divided into single head, double head and explosion-proof and other models.

Technical parameters:

Model	G1LGD100-5000
Voltage	AC220/110V 50/60Hz
Power	20W
Air pressure	0.4-0.6Mpa
Filling speed	5-30 Bottles/min
Filling accuracy	$\leq \pm 1\%$
Adjustable model	10-100ml, 30-300ml, 50-500ml, 100-1000ml, 500-2500ml, 1000-5000ml
