

SED-120WZHP-A Multifunction High Speed Automatic Cartoning Machine For Toothpaste Cosmetics

Folding gluing machine is multifunction high speed machine, imported electronic components, adopt synchronous belt transmission and electronic continuously variable speeder, feeding section adopt mechanic continuously variable, stable and easy to control and operate.

It is widely used in food, medicine, cosmetics, stationery and other ordinary cartons, process and perfectly combining the requirements of auto packaging together. (in case of any special function required, we can design according to the customer's intention.)

Advantages

1. The main drive adopts ribbed v-belt featuring stable running and precised transmission.
2. Using servo motor drive for paper feeding to accurately adjust the feeding speed and adjust the density of the carton.
3. Using T-screw for the adjustment of all guide plates (electronic screw is optional), adjustment can be easily and accurately.
4. Several thicker belts with the vibrating motor (suction feeding is optional) make the paper feeding continuously and smoothly.
5. The highly integrated crutch shaping structure makes the adjustment of all standard and non-standard cartons easily.
6. The electric glue spraying system is convenient to remove and clean.
7. Crutch belt is with automatic tension function.
8. With small box positioning device, the taller or shorter boxes can be shaped accurately.
9. Adopt the photoelectric counter and kicking device.
10. The servo motor combined with the reverse hook device can finish the folding action accurately.

11. The transmission part can adjust the paper receiving position by sliding the belt up and down. It adapts to all carton models.

Product Parameters

Speed		30-120 boxes/min
Box	Quality requirements	300-350g/m ²
	Size(L×W×H)	(65-180)mm×(35-85)mm×(15-50)mm
Instructions	Quality requirements	60-70g/m ²
	Unfold size range(L×W)	(80-250)mm×(90-170)mm
	Folding range(L×W)	1-4 fold
Compressed air	Work pressure	≥0.6mpa
	Air consumption	120-160L/min
Power Supply		220V 50HZ
Main motor power		0.75kw
Size(L×W×H)		4300mm×1100mm×1550mm
Weight		约1600kg
