

SED-4-4XZGF Automatic Liquid Suction Nozzle Bag Filling Capping Machine

This machine is designed for filling and capping of various liquids. The filling host in the filling production line uses a plunger pump for filling.

The plunger pump is a filling quantitative device, with stable performance, high reliability, and complete filling. The integration of automatic capping and automatic capping is completed (can be customized), and it has the function of no bottle filling.

Reasonable design, compact structure, easy operation and maintenance, in line with GMP design standards. Material contact parts are made of stainless steel 316, which is corrosion-resistant and fully meets food hygiene standards.

Product Parameters

Model	SED-4-4XZGF
Material	Stainless Steel
Capacity	50-60 bag/min
Filling range	80-180mm
Voltage	380V/220V
Noise	≤70dB
Weight:	980kg
Size:	2160*1200*1500mm
