

SED-3500J-C Durable Pill Capsule Filling Machine

The maximum capacity is 3500 grains per minute. Product standardization and series production: The universal interchangeability of manufactured parts reaches over 98%, and each component has a fixed code. The positioning holes for mold replacement parts have high accuracy in positioning and repeated positioning; Quick mold change, easy operation, and convenient cleaning.

Features

High-capacity HD can be record message, meet CGMP, FDA certification

With Japan imported beeline bearings, make sure the machine long work life and precision of machine

The working station cam runs under the good lubricating condition and maintaining the inner lubrication of cam slot to a full extent, increasing the pressure pulverization oil pump, extends the operation life of the spare parts Single movement for both upper and lower segments with two lip seal provide a much better sealing performance

Adopt the PLC and touch screen control, step-less frequency conversion motor, all parameter can be set up in the touch screen, make the operation very convenient

Three-dimensional adjustment of the dosing disk, space uniform, to ensure accurate filling, the capsules yield up to 99%

It has a protector for operation and machine, can auto pause when the machine lack of capsule or powder, insure the machine running stable, safe.

Add the mold blowing air, sucking air function, insure the mold hole without dust when fill the capsule.

Technical Parameters

Model	SED-3500J-C
Weight	2400kg
Size	1440×1300×2080mm
Power	6.37kw
Voltage	3 phase AC 380V;50Hz
Capactiy	210000 pcs/h
Capsule size	00#~5#,safty capsule A~E
Noise	≤75dBA
