

SED-200MK-R Automatic Frequency-type Double-head Vibration Tablet Counting Machine

This machine is automatic frequency-type double-head counting machine for counting and filling tablets, pills, capsules and other shape tablets in pharmaceutical, food, daily chemical industries. Besides, the equipment is completely in line with GMP requirements.

Feature

- Vibration head adopts a flexible structure of eccentric screening and super mute, allowing to continuously variable adjustments for the eccentric screening.
- Low noise, stable tablets discharging, accurate counting, regulating speed by frequency conversion.
- An optical system of the machine can automatically stop discharging tablets when no bottles are detected, with advanced design, reasonable and compact structure.
- Machine body is made up of stainless steel and plexiglass, fully in accordance with the GMP standard.

Product Parameters

Model	SED-200MK-R
Applicable specification	15-500 ml
Capacity	20-60 bottles/min
Tablet specification	Diameter: 3-25mm
Capsule specification	#0—#4
Filling accuracy	$\leq \pm 1\%$
Voltage	3P 4wires 380V, 50/60Hz
Power	1.2 kW
Vibration amplitude	0-1.6mm
Machine weight	500kg
Machine dimension	L2000*W1200 ×*H1800mm
