

SED-520-29GY-B High Production Efficiency Candy Tablet Press Machine

SED-520-29GY-B automatic high-speed rotary tablet press is widely used in pharmaceutical industry, food, chemical, electronic and other industries. Can press all kinds of granular materials that meeting the requirements. It can also press special shaped tablets and double-sided engraving tablet.

Feature

- The pressure is high enough to meet the better quality of the tablet.
- Use IPT punch, double pressure double side output, high production efficiency.
- The control part adopts PLC, and the operation panel uses color touch display screen, easy to operate.
- Equipped with closed forced feeder. When the equipment runs at high speed, it fills the material forcibly, shortens the filling time and ensures the stability of tablet weight.
- Equipped with main pressure display, pressure overload protection device, when the pressure overload, machine can automatically stop. There are overpressure protection, emergency stop, frequency converter fault alarm protection, strong exhaust heat dissipation device.
- The working area adopts fully closed transparent windows with less dust pollution and excellent sealing. Components are made of stainless steel or special surface treatment, which can prevent cross pollution and meet GMP requirements.

Product Parameters

Model	SED-520-29GY-B
Number of Punch Die	29
Punch Type	IPT'D tooling
Max. Pressure	100KN
Max. Tablet Diameter	25mm
Max. Tablet Thickness	6mm
Max. Filling Depth	18mm
Max. Turret Speed	40 rpm
Max. Capacity	121800 pcs/h
Main Motor Power	7.5KW
Net Weight	2380kg
Overall Dimension	1200*900*1800mm
