

SD-350 High Speed Candy Packaging Machine

Automatic feeding and film wrapping for regularly shaped confectionery. Servo control and film-feeding mechanisms coordinate product handling with the wrapping cycle.

Individual film-wrapped confectionery

The infeed and wrapping setup must match candy dimensions, shape, surface behavior and film. Send physical samples to define the feeding and sealing arrangement.

What matters on the SD-350

Servo-controlled operation

The source describes servo control for coordinating product movement with the packaging cycle. Final speed depends on successful feeding and wrapping trials.

Film-feed arrangement

Automatic film feeding and a dual-roll arrangement are described. Confirm the required film-change function in the selected configuration.

Cleaning access

The product belt is described as removable without tools, with a collection trough below. Review access for your confectionery and cleaning process.

Specifications

Model	SD-350
Candy Size	L: 35 mm W: 13.5 mm H: 13 mm (Customizable)
Packaging film material	BOPP film
Gross weight	1000 kg
Machine Size	L2400*W1340*H1760 mm
Total Power	4.5 kW
Voltage	220 V/50 Hz
