

Linear Filling Capping Machine SD-ZGF-1000

The linear filling capping machine named SD-ZGF-1000 linear filler capper is composed of bottle-setting, filling lid-laying and lid-rolling equipment. It is a kind of straight-line filling and lid-rolling machine for packing cosmetic liquids and creams both in plastic bottles and glass bottles.

Feature:

1. The filling and lid-rolling (capping) of this machine can be adjustable according to the requirement of producing output.
2. There is a special device that at the filling head which can automatically eliminate froths and prevent dropping and leaking.
3. The machine can be together with bottle-washing machine, sterilization, oven, and label-attaching machine to form an all-auto-produce line.
4. The whole machine is made of stainless steel, meeting the GMP requirement.
5. Standard: CE of EU, ISO9001, GMP

Technical Parameters:

Filling Amount	20-60ml; 60-150ml
Filling Diameter	φ25-φ45mm; φ45-φ80mm;
Motor Power	1.5KW
Voltage	220V 50/60HZ
Producing Ability	3600-12000 Bottle/Hour
Dimensions	1800×1200×1400mm (L×W×H)
