

Multi-jet ampoule washing machine

Salient Features

- Positive & pressurized jets through washing needle for pressure cleaning at minimum usages for washing media.
- Sound design concept of pressure tank for reverses & continuous supply of washes Medias.
- Both internal & external washing ensuring absolutely & continuous ampoule / vial after sequential washing.
- Acrylic top cover for clear view of washing events taking place in the machine.
- On-line poly carbonates housing with P.P. replaceable filter cartridge of 5 micron of water for best possible washing.
- All contact parts of washing media are of S.S.
- In the event of acrylic cover lifted during cycle operation, the machine will automatically stop and re-start from the point when cover is pushed down.

Technical Specifications

Direction	Left To Right.
Cycle time	60 Sec
Power Consumption	0.25 HP
Power Characteristics	415 V, 3 -Phase with 4 Wire Systems.
Machine Dimensions	1150 mm (L) x 1050 mm (W) x 1200 mm (H)
Net Weights	130 KGS
Gross Weight	260 Kgs
