

Auto Sleeving Machine DSV-300P

MACHINE FEATURES

- 1. Specially designed knife plate is needless to be changed within the rated specification. If needed, Knife plate change-over can be performed under 3 minutes.
- 2. Forceful insertion designs could lower producing cost for you.
- 3. Integrated adjustment design for the entire transmission mechanism give you the maximum convenience for accommodating different types of label specifications.
- 4. Accommodates film paper core size of 5"-10" with variable adjustments.
- 5. PLC (Programmable Logic Control) for increased accuracy and speed over conventional controls.
- 6. With low tension control on the feeding system, the sleeve supply becomes smoother, enabling it to supply faster when the sleever speed increased.
- 7. Perforation device for tamper evident caps available.

Specification

Max speed	300BPM.
Bottle Diameters	φ25mm~φ125mm.
Film Material	PVC /PET /OPS.
Film Width	PVC: 0.035mm~0.08mm, PET: 0.04mm~0.06mm, OPS: 0.04mm~0.06mm .
Machine Size	860mm*1090mm*2674mm(L*W*H) .
Voltage	Power source: 3P; 220V, 380V, 440V (Choose one from the given selection).
