

Automatic Cartoning Machine

Introduction:

RI series of weight sorting machine is an online, high-speed, high-precision dynamic weight weighing sorting system.

The system in the configuration interface accessories and special software can be used with the factory management center for product quality data communication, can form a variety of statistical reports.

Detection of weight: 5 ~ 3000g> sorting speed: 20 ~ 80 times

Resolution: $\pm 0.2g \sim \pm 1.5g$

Features:

- Stainless steel appearance, beautiful equipment, high-end, stable operation;
- Simple operation, according to the needs of production capacity, set the operating speed;
- Can be completed automatic suction box, open the box, into the material, folding ear, spray plastic, pressure box molding, output, etc.;
- Equipped with imported brand spray machine, stable and reliable performance;
- Using PLC control, touch screen operation, according to product and box type sealing requirements, set the form of spray (spray or spray);
- With the ribbon coding machine, thermal transfer Da Maji, Pen Maji connection;
- Can greatly reduce the packaging workers; improve packaging quality and production efficiency;
- Can be stand-alone or with other packaging equipment to complete the automatic flow of operations.

use:

The equipment is widely used in food, pharmaceutical, chemical, hardware and other industries.

Production speed:	30-60 boxes / min (speed adjustable)
Packing specification:	L 140-250mm × W 50-180mm × H 40-60mm
Electrical power:	three-phase 380V50-60HZ 5.5KW
Overall dimensions:	Overall dimensions: L 6100 × W 1900 × H 1800mm
