

YTSP Automatic 6-heads Filling and 2-heads Capping Machine for Eye Drops

Monoblock Liquid Filling & Plugging and Capping Machine with functions of automatic filling, loading plugs and capping. The number of steps to set the microcomputer implementation of metering peristaltic pump filling (special occasions ceramic pump), and with automatic Filling, automatic Loading plugs, under cover, capping a variety of functions. It is the Pharmaceutical industry of a new generation production of ophthalmic eyedrop, the machines meet one of GMP authentication. Requirements can also be used in other industries small doses of liquid filling, Plug ing, and capping production.

Suitable for the industrial as below:

Bottles of liquor, beverages, oral liquid, alcohol, perfume, eye drops, spices, liquid medicines and other liquid quantitative filling.

Feature:

- Microcomputer settings, perform peristaltic pump filling material contact parts are all silicone tube, easy to clean, disinfect clean, corrosion-resistant, high temperature.
- Without stopping to set the filling volume and tuning.
- Filling execution and system functions have shrunk, no bottle no filling, no drip.
- Automatic display technology features, free speed.
- Photoelectric control, no bottle no filling, no less than the cap, no cap.

- Set torque cap, capping quality and reliable, no loosening.
- An auto-complete filling machine, automatic cap, under cover, capping.

For the liquid:

Bottles of liquor, beverages, oral liquid, alcohol, perfume, eye drops, spices, liquid medicines and other liquid quantitative filling.

Parameters:

Main motor power	0.75KW
Production Capacity	20-30pcs/min
Filling volume	5-100ml
Air supply pressure	0.6-0.8Mpa
Dimension	2175*1450*1380mm
