

SJ-2 Locking Machine

This machine is specially used to lock the loose lid further after aluminum film sealing to ensure the packaging effect. The device structure is simple. It is the ideal auxiliary production line equipment.

Performance advantages:

- ◆ Operating system – using the traditional user interface, simple, safe and reliable.
- ◆ Electrical components - using internationally renowned brands to ensure the equipment is reliable.
- ◆ Mechanical parts - the main parts of the machine are made of high quality stainless steel 304.
- ◆ Maintenance situations - the machine meets the GMP requirements, easy to disassemble, clean and maintain.
- ◆ Adjustment situation – simple to adjust, easy to get.

Technical parameters:

- ◆ Maximum production speed: 8000 bottles/hour
- ◆ Application bottlenecks: $\Phi 40\text{-}\Phi 96$ mm
- ◆ Application cover diameter: $\Phi 28\text{-}\Phi 72$ mm
- ◆ Power supply: 220 V/50 Hz
- ◆ Power: 0.6 KW
- ◆ Dimension: 1000×500×1500 mm
- ◆ Weight: 100 kg
