

## Automatic Single Head Auger Filler Machine

### Features:

- \*Screw feeding and filling, quantitative packing and stable operation.
- \*The stock bin can be opened flatly and is easy to disassemble for clearing without any tools;
- \*The screw is driven by the servo motor and the parts which materials may contact are made of stainless steels;
- \*Different weights and accuracy can be weighed by changing screws, so it is applicable for various powdery materials;
- \*Feeding bin with vibration function, more convenient to use.

### Application:

- \*Suitable for filling of various powder material.

### Specifications:

Weighing Ranging(g)	10-5000g
Weighing Accuracy(g)	±1.5g
Max. Weighing Speed	20-35 can/min
Can Diameter	40-130mm
Can Height	60-220mm
Stock Bin	220L
Can Volume	50L
Driving System	servo Motor
Power Requirements	220V / 1000W / 50/60HZ / 10A
Packing Dimension(mm)	2000(L)x1200(W)x2300(H)
Packing Weight(kg)	420KG
