

## Flat Plate Alu Alu Blister Packing Machine DPB-88

This machine is designed and improved by our technician according to the feedback of our customers who have been using our products for many years. It is widely used in the of medicine, food, electron, hardware for Alu/PVC blister packing of various nubby object and liquid. It has effect of moisture proof and dust-proof, and enhancing level and additional value of products. It can also be linked to work with pillow-type packing machine and boxing machine.

### Characteristics:

- Compact configuration, calm runs, easy manipulation and convenient maintenance;
- Steplessly variable frequency sped regulating, PC circuit control panel (can be equipped with touch screen);
- Adjustable travel, mouldid spout location, convenient for changing moulds;
- Adopt manipulator grip, has accurate synchronization;
- With cylinder heat-sealing, the upper and lower checkers ensure the effect of heat- sealing, also prolong the using life of the machine;
- Can design any mould and feeder according to customer's requirement.

### Technical parameters:

Punching Frequency		50time/min Standard Edition
Punching Plate		4ate/hour
Adjustable Scope of Travel		30~160mm
Productivity		12000 plate/hour
Max Forming Area and Depth		240x155x24mm
Total Power		Phase four-wire 380V 50Hz 5.5Kw
Specificationa of Packing Material	Medical PVC	250x(0.25~0.4mm)Standard Edition
	PTP Alu Foil	250x0.02mm
Air-compressor		100L/min
Pressure		0.5~0.7MPa
Machinery Dimension		4000x750x1650mm
Weight		2000kg
