

BZ30 Overwrapper Machine

Brief Introduction

The overwrapper machine BZ30 is newly developed packing equipment.

It is used for wrapping collations of cartons by BOPP films with high output.

It is widely applied in pharmaceutical, food, chemical industry.

Advantages

1. Compact and solid modular design
2. Wide packing range, esp. for the products clear of heat.
3. High output ensures the production capacity.
4. The wrapped products have good and compact appearance.
5. Easy operation and quick maintenance highly guarantee packing quality and the production capability.
6. Packing material is greatly saved.
7. The machine fully meets the GMP requirements.
