

DPH-130 Medication Aluminium-plastic Blister Packing Machine

This roller type Aluminium-plastic Blister Packing Machine is used for packing different sizes and shapes of tablet, capsule, pill, candy and other solid granule type product. It can be used in the pharmaceutical, foodstuff and chemical industry.

Features:

1. This blister pack packaging machine is easy to alter blister size, replace mould and adjust the machine in a short time even without senior experts and special tools.
2. It is small size, compact structure and high productivity.
3. It adapts famous brand key component for ensuring smooth and reliable operation.
4. Accurate PVC heating and temperature control without any harm to packing material and packed subjects.
5. Don't have waste on pack edge, save packing materials; stepforward cutting make blister smooth and reliable adjustment.
6. Computer controls the whole machine, running stepless speed regulation.

Technical Parameter:

Model	DPH-130 Aluminium-plastic Blister Packing Machine
Max.Punching frequency	120 times /min
Max. Molding depth	12mm
Max. Format area	130mm x 160mm
Max.material width	140mm
Max.Stepping length after cutting	1950mm
Max. Stepping length before cutting	105mm
Max.dia.of material	PVC 400mm, Al Foil 280mm
Inner dia. Of material	70-76mm
Water consumption	3.2L/min
Air consumption	25L/min
Power supply	380V/50Hz
Power	7KW
Net Weight	1200kg
Dimension	L : 2050*W : 830*H : 1800mm
