

WZH-120 Horizontal Boxes Packaging Cartoning Machine

The machine can be linked with aluminum-plastic packaging machine, pillow packaging machine, three-dimensional packaging machine, bottling line, filling machine, labeling machine, inkjet printer, and online weighing instrument, other production lines and other equipment.

Feature:

- It adopts the packaging form of automatic feeding, opening the box, entering the box, marking the batch number, sealing the box, rejecting the waste, etc. The structure is compact and reasonable, and the operation adjustment is simple.
- Using servo / stepper motor and touch screen, PLC programmable control system, man-machine interface display operation is more clear and simple, high degree of automation, more humane.
- The use of photoelectric eye automatic detection and tracking system, empty bags without boxes, to maximize the savings of packaging materials.
- The packaging range is large, the adjustment is convenient, and the rapid conversion can be realized between various specifications and sizes.
- The replacement specifications do not need to change the mold, just adjust to achieve, PLC automatically shows the boxing speed and finished product count.
- It adopts the automatic stop of the item into the box and the main drive motor overload protection device, which is more safe and reliable.
- According to customer requirements, the use of upturned safety shield, easy to operate, beautiful appearance.
- Various automatic feeders and box-entry systems can be designed according to the requirements of the packaging.
- According to customer requirements, the hot melt glue machine can be equipped with hot melt glue spray seal box and mechanical brush seal box.

Data sheet:

Model	WZH-120
Speed	50-100 box/ Minute
Box dimension range	L(50-230)mm×W(20-90)mm×H(15-70)mm
Quality requirement	250-450g/m ³
Main motor power	1.5KW 380V 50Hz
Machine noise	≤80dB
Air	0.5-0.8 Mpa
Air consumption	120-160L/min
Overall dimensions	3170×1260×1750 mm
Weight	1200Kg
