

Automatic Tube Filling Machine

Features:

- A Fully Automatic Lami/Plastic Tube Filling machine, with have high operating speed and 12 Stations compact rotar.
- Model – GMP Capable to fills from 40-300ml
- Its contact parts are manufactured using quality stainless steel of grades 316
- These machines are no tube – no fill device, with a bottom up filling system and filling accuracy +/- 0.1%.
- These machines have a tube diameter of 16-60mm and height 60-258mm
- The tube holding Cup is manufactured using quality stainless steel of grade 304.
- Manifold cam indexing device Make Camfield.
- Geared Motor 0.5 HP, RPM-40 REMI make
- Belt Less Stirrer Device with augur to keep the product in Continuous homogeneous condition.
- Easy to operate
- Compact in design
- Indian made hot air or Switzerland hot air
- Jacketed hopper with stirrer
- Tube counting device
- Tube orientation

Applications:

- Pesticides bottle
- Pharmaceutical bottle
- Textile
- Talcum powder bottles
- Playing cards
- Mineral water

- Pickle bottle
- Soap & shampoo bottle
- Gift items
- Welding rods

Technical Specifications:

Packaging Type	Plastics Tubes, Metal Tubes, Laminated tubes
Filling Speed	40 TO 50 TUBES PER MINUTES
Capacity	40 TO 50 Tube / Minute
Filling Range	5 GRAMS TO 250 GRAMS
Number Of Heads	1
Power Consumption	3kW
Machine Type	Automatic
Voltage	220 / 440
Pressure	6 KG
Brand	Bhavani
Color	ANY
