

Automatic Labeling Machine

Automatic self-adhesive double-sided labeling machine is suitable for single-sided or double-sided labeling of flat bottles, special-shaped bottles and square bottles in daily chemical, home chemical, medicine and food. Such as lubricant bottles, laundry detergent bottles, shoe polish bottles, fish bottles, beverage bottles, cosmetic bottles etc., optional ribbon code printer or inkjet printer, labeling at the same time to achieve print production batch number, production date and other information, to achieve Labeling and ink jet printer Integration, reducing the packaging process and improving production efficiency.

Technical Parameters:

- Label specification: length 15~250mm; width 20~150mm
- Product Specifications: Length 20~300mm; Width 30~90mm; H60~350mm
- The outside diameter of the label: Φ 280mm;
- Roll diameter: Φ 76mm
- Labeling speed: 10~80/min
- Labeling accuracy: \pm 1mm
- Air pressure: 0.6~0.8Mpa
- Power: 850w (step), 1150w (servo)
- Voltage: 220V 50Hz
