

AFS-8 Ampoule Filling Sealing Machine

Apply sample trial test and small batch production in pharmaceutical industry, ampoule filling and sealing in the condition of sterile.

The machine is eight position stepping transmission system, a group of eight ampoules enter each position each time, complete send bottle separately, filling nitrogen before, filling liquid, filling nitrogen afterwards and pre-heating, sealing etc process.

Technical parameter:

| | |
|-----------------------------------|---|
| Ampoule specification | 1/2ml |
| Capacity | About 16000-18000 bottles/hour |
| Material filling head | 316 stainless steel |
| Total power | 0.55kw |
| Fuel consumption | 3-4m ³ /h(gas), 0.08-0.1mpa(PLG) |
| Combustion-supporting consumption | 0.1Mpa(1m ³) oxygen |
| Dimensions | LxWxH:1850x900x1500mm |
| Weight | 400kg |
| Power supply | 380v 50Hz |
