

Auger Screw Conveyor For Powder

Auger Screw Conveyor For Powder is a kind of machine which uses motor to drive the screw to rotate and push the material to realize the purpose of conveying.

Auger Screw Conveyor For Powder can be transported horizontally, obliquely or vertically.

Auger Screw Conveyor For Powder can complete mixing, stirring, cooling and other operations while conveying materials.

Technical Specification

- Convey height: 4200mm (adjustable)
- Scraping belt width: 300mm
- Flapper height: 100mm
- Material: 304#SS
- Conveying volume: 3~6m³/h;
- Power Supply: 380V, 50/60HZ, three-phase supply , 7.5KW
- Gross weight: 450KG
