

Liquid Filler and Capper DLF-2

DLF-2 is new generation liquid filler and capper which can complete the process of filling, cap feeding and capping on one machine FOR Diagnostic Reagent tube. It is easy to operate and adjustment. The advantage design could complete the tube sorting and feeding, cap sorting and feeding automatically. DLF-2 can fill different kinds of liquid in pharmaceutical and chemical industry with high precision.

Key Features:

- The peristaltic pump concept as a metering device to fill correct amounts of liquids into containers.
- Automatically tube and cap sorting and feeding system
- Suitable for a variety of containers
- High filling accuracy
- 20 groups data can be stored
- Pump unit easily dismantled for cleaning

Specifications:

Model	DLF-2
Capacity	15-20 bottle/minute
Filling volume	5 ml – 50ml
Filling Accuracy	≤±0.5%
Contact part	SS316L
Bottle size	Customized based on the requirement
Dimensions (L*W*H)	1800mm×1600mm×1800 mm
Weight	180kg
