

NJP-2000 Automatic Capsule Filling Machine

NJP-2000 is designed on the basis of NJP-1200 automatic capsule filling machine. It can meet the requirements of mass production. Its functions reach the advanced level at home and is the ideal equipment to produce capsule medicine in current pharmaceutical industry.

Technical Parameter:

Model	NJP-2000	
Output	2000 pcs/min	
Filling material	Powder & granule	
Quantity of mode holes	18	
Power supply	380V 50Hz 3P	
Total power	6.97KW	
Appropriate capsule model	00#-4#	
Difference of filling volume	±3%-±4%	
Noise	≤75dB (A)	
Capsule probability	99.9% for empty capsules, over 99.5% for full capsules	
Dimensions	Machine dimensions (L*W*H)	1200*1050*2100mm
	Packing dimensions (L*W*H)	1400*1400*1950mm
Main machine weight	Net weight	1300kg
	Gross weight	1400kg
