

4 Head Liquid Filling Machine RTFM-4

The automatic 4head liquid filling machine adopts electric, mechanical and pneumatic principles. A counter is used to control the filling tube, and a special filling nozzle is designed to reduce bubbles during filling.

It is widely used in food, chemical, pharmaceutical and other fields, and the filling volume can be designed according to customer requirements.

Description

Rito machinery company's 4 head liquid filling machine has gained very wide adoption throughout the world, also many chemical and cosmetics factory were stronger recommended, and then meets GMPs.

Feature:

1. Products can be customized according to customers' samples.
2. It adopts piston quantitative, electromechanical and pneumatic integration, and the electric and pneumatic components adopt well-known brands.
3. The screen design is reasonable and the operation is simple.
4. Compact structure, beautiful appearance, stable and reliable performance, and convenient maintenance.
5. Filling accuracy and adaptability.

This machine is a standard model, if you need to customize it, please contact the salesperson.

Technical parameter:

Model	RTFM-4
Voltage	AC220/110V 50-60Hz
Power	1850W
Air Pressure	0.6-0.8MPa
Filling Speed	1000-1200bph
Filling Accuracy	±1%
Filling range	50-1000ml/500-5000ml
Machine Size	2100*1050*2250mm
Required Air Compressor	≥7.5kw 200L
