

LONGFORD INTERNATIONAL

Multinational Carton and Paper Box Manufacturer

Provide massive labour savings and collation quality assurance by installing a custom selective collator that discharges directly into a high speed folder gluer. Design/build a (24) station custom selective collator that feeds, collates, shingles, stacks and transfers stacks of carton blanks into the infeed of a folder gluer. Line must allow for speed fluctuations of folder/gluer by having an inline buffer/shingled system.

System Specifications:

24 x C350 Surge Feeders

1 x Custom Buffer/Shingling System

1 x Custom Longford ADX Conveyor

1 x Automatic Transfer To A Folder Gluer
