

## XT-610 Series of Cap-screwing Machines

It used for cap putting, screwing and rolling and pressing work of unnormal shape bottles with different materials and specifications. Screw tops, theft-proofing caps, press-in caps and other cap types are applicable. It is convenient to adjust pressure with the adopting of constant torque cap-screwing head. Structure is reasonable and compact, so this machine is convenient to be matched to other machines. Dust guard is selectable.

### Main performance and features:

1. Applicable for cap screwing or rolling and pressing for different bottles.
2. Applicable for plastic and glass bottles.
3. It makes no pollution and noise, has no dead angles and low consumption and is easy to clean.

### Technical parameters
