

Automatic Toothpaste Filling and Sealing Machine

Automatic tube filling and sealing machine used for plastic, aluminum, laminate tube. It is one of main latest products of our company. It is full automatic. This machine can be used for filling cream and liquid materials.

Advantage:

1. It is applicable to fill liquids and creams of different features such as ointment, cream, pigment and adhesives. The automatic material feeding system is optional.
2. Fully-automatic operation are realized from tube feeding, filling, tail sealing, number coding and self-ejection.
3. The machine applies the mechanical principle and PLC control system.
4. The machine has function of output count, no tube no filling system and protection system of failure warning.
5. The machine panels are made of SS304. The material is optional for contact part.
6. The filling system is assembled by couplings, easy to clean.

Technical Parameters:

Operation Speed	160/Min/(Max)
Filling Volume	1-300ml
Filling Precision	$\leq \pm 0.5\%$
Suitable Tube Length	50-240mm
Suitable Tube Diameter	10-50mm
Power Supply	380Volt, 50Hz (220Volt, 60Hz)
Power Of Hot-Wind Generator	3Kw \times 2
Consumption Of Compressed Air	1.2 M
Working Pressure	0.6 Mpa
Capacity Of Hopper	70L
Dimensions	2870 \times 1770 \times 2340mm
