

## Automatic Can Filling Machine JT-AF-4

Automatic Can Filling Machine is a photoelectric sensor, microcomputer (PLC) programmable control, pneumatic actuator in one of the high-tech filling equipment. This type of special food, such as wine, vinegar, soy sauce, spices, syrup, vegetable oil, mineral water.

### Feature:

1. Any dose within the range of 10-1000ml can be filled.
2. Automatic Can Filling Machine is fully automatic liquid filling machine with conveyor belt in and out bottles, PLC microcomputer control system, photoelectric sensor monitoring, pneumatic execution, Chinese touch screen control, high degree of automation. The machine can automatically count the number of filling bottles, no bottles or no bottles filling, single person can easily operate the entire assembly line, the operator has no skill requirements.
3. The machine for chemical and beverage liquids made of 316 quality stainless steel, corrosion resistance.

### Technical Parameters:

Model	JT-AF-4
Operation method	PLC touch screen control ( SIEMENS )
Material	SUS304 Stainless steel
Filling nozzle	4 nozzles
Filling volume	5-8000ml
Filling speed	20-50 bottles/min
Filling accuracy	±0.5%
Air supply	0.4-0.7Mpa
Voltage	220V, 50Hz (can be customized)
Dimension	1560 x 1200 x 2150 mm
