

GOLDEN LIN

Automatic Piston Filling Machine GL-08M

Characteristics:

When filling up circularly, the piston shall be backward from front position and lead the movable controlling valve into cylinder, when the piston return to the end, the movable controlling valve will turn to the discharge position, then the piston goes forward, the product will be discharged to the container by fill-up tube

Specifications:

Applicable For :	8
Range of can dia. :	202-401mm
Range of can height :	100-160cpm
Horse power require :	2HP
